

FRAGILE MEDICAL MATERIALS

Distribution Date: _____
(Date MUST be completed at the time of transport)

is a trained courier transporting human cells for transplantation from
to _____ for a patient who is awaiting a stem cell transplant.
It is imperative that the blood stem cells be transported without delay and that the blood stem cells remain with the courier at all times.

**WARNING: PLEASE HAND INSPECT AT AIRPORT SECURITY CHECKPOINTS.
DO NOT X-RAY.**

This product should not be x-rayed; since x-ray may damage life-saving cells contained in the product and may cause life-threatening complications in the patient receiving the transplanted cells.

If there are any questions regarding the transport of these blood stem cells, please contact NMDP. The Centers for Disease Control and Prevention has determined that a U.S. PHS Import Permit is not required for importation of this type of product.

Product type: HPC, Apheresis: 57MH-02
 MNC, Apheresis: 57MH-03
 HPC, Marrow (not regulated, no product code)

The product indicated above, has been packaged, labeled, and is being transported in accordance with all applicable regulations.

Questions may be directed to NMDP:

Couriers and TSA Agents: 763-406-8617 (24 hours, 7 days a week)

All other callers: 763-406-4400 (after business hours; ask for the Case Manager on call)

Thank you for your prompt attention to this urgent matter.

John P. Miller, M.D., Ph. D
NMDP Senior Medical Director
