

<Date>

Hello,

Did you know that a blood stem cell transplant can cure or treat more than 75 diseases—including blood cancers like leukemia and lymphoma as well as blood disorders like sickle cell? While a blood stem cell transplant can provide hope, or even a cure, for someone with blood cancer or blood disease, it takes a lot of people—and to be honest, a lot of money—to save lives through cell therapy.

But there is something we can do because everyone deserves a second chance—especially when a cure is within reach. That’s why I’m raising funds to help grow the NMDP RegistrySM of potential blood stem cell donors, invest in innovative research and provide grants for patients facing financial barriers to treatment. Every dollar matters—and every dollar does a lot of good in the lives of the patients who need us.

NMDPSM is a global nonprofit leader in cell therapy, helping find cures and save lives for patients with blood cancers and blood disorders. All funds raised go toward NMDP’s life-saving mission.

With your support, I have a goal of raising <fundraising goal amount> for NMDP. Would you please consider making a donation?

All donations are tax-deductible, and you can donate online at <insert fundraising page link> or mail your contribution directly to me. Checks should be made payable to the NMDP FoundationSM.

Thank you in advance for your time and generosity.

Sincerely,

<Name>
